Instructor Related Questions: Philip Bogden (20 comments)

Q: What were the strengths of this course and/or this instructor?

- 1 up-to-date with current web dev technologies
- 2 The in class exercises were great. Some parts of the course material had so many moving parts that it was very helpful to work with my classmates to understand logic, syntax, etc. Professor Bogden was great about answering questions and clarifying key concepts.
- 3 easy and water
- 4 Very accommodating and reasonable professor, who brings a lot of resources for the students to refer to apart from coursework.
- 5 Enthusiasm for the content, availability of support, and the structure of the assignments and challenges presented in the course.
- 6 Throughout the course, I found the material to be exceptionally well-structured and thoughtfully delivered.
- 7 Passionate about web development technologies, platforms, and knowledgeable.
- 8 Good teaching.

Q: What could the instructor do to make this course better?

- 1 Not in relation to professor but if an additional web dev class was offered to have more time to work with all the different tools and frameworks
- 2 Sometimes homework due dates were a little confusing but otherwise, no notes.
- 3 Nothing
- 4 I'd appreciate slightly more time spent in class discussing theoretical concepts. We spent a lot of time in active programming work (which I really enjoyed) but I think a few more minutes of each class could have been focused on theory, structure, or best practices-- since often our assignments were to finish the in-class activities, it would have been okay to have the in-class activities get slightly less time
- 5 Maybe some additional readings/ information/ tutorials about different frameworks, or beginning each class with a 'here is the big idea for today, and what I want you to leave today's class having learned'. He does do this, but I think maybe needs to be a bit clearer in what will be covered, and how it fits into the big picture,
- 6 Perfect.

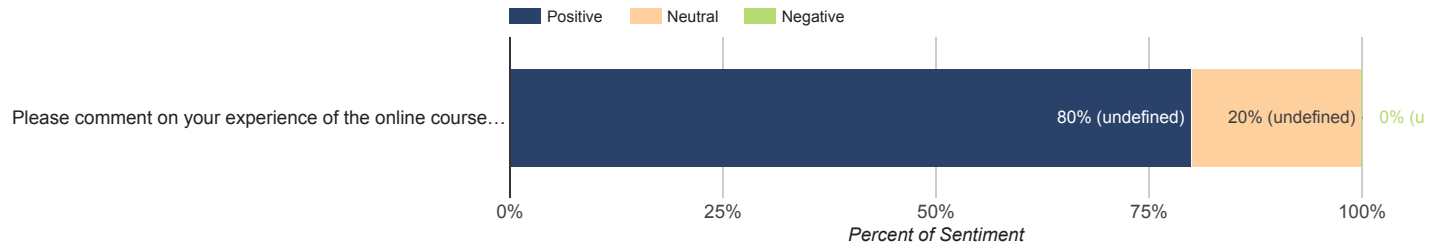

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

- 1 In class exercises > lectures.

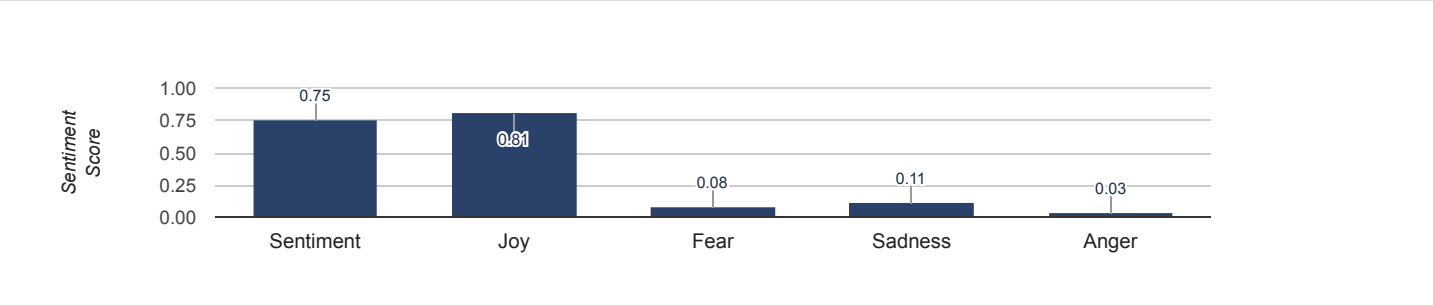

I love a good lecture to introduce ideas but actually doing the coding myself really helped to make the connections in my mind.
- 2 N/A
- 3 Professor Bogden really focuses on inclusive learning. I appreciated the commitment to PollEV and making sure we were all progressing smoothly through the assignments.
- 4 The professor is fair and provided necessary feedback in a timely manner.
- 5 Enjoyable, friendly and welcomes questions.
- 6 Knowledge.

Questions to Assess Students' Online Experience (5 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1 Professor Bogden did a good job keeping everything accessible and organized. ★★★★★
- 2 Taught trending web development technologies instead of obsolete technology. Gave the liberty to experiment with things. ★★★★★
- 3 This course occurred mostly in person. The online materials were well organized and helpful. ★★★★★
- 4 This course has been enjoyable and informative. I learned a lot. ★★★★★
- 5 That's good. ★★★★★

Student Self-Assessment of their Effort to Achieve Course Outcomes (5 comments)

Q: What I could have done to make this course better for myself.

- 1 I learned a lot in then course and feel good about my habits and the professor's teaching style. I could have made it better by practicing more rather than diving immediately into the homework but we do so much in class work that it didn't seem necessary.
- 2 Do even more projects for myself.
- 3 I could have devoted a little more time to research and skill development-- our assignments were every open ended and I could have challenged myself further. I would have needed better time management for that, though!
- 4 I could have been more consistent.
- 5 Attend the course.
