Q: What were the strengths of this course and/or this instructor?

- 1 Teaches very well
- 2 The instructor is cooperative and understanding. She is willing to help however the logistics of the course are extremely imbalanced. The course slides and assignments have a huge gap and it is really struggling to wrap your head around everything.
- 3 Organised and clear assignment and deadline instructions on day 1 of course.
- 4 Practical implementation
- 5 It taught me a lot of new stuff. I didn't expect to learn so much in the field of Information retrieval and how vital it is in the tech world.

Q: What could the instructor do to make this course better?

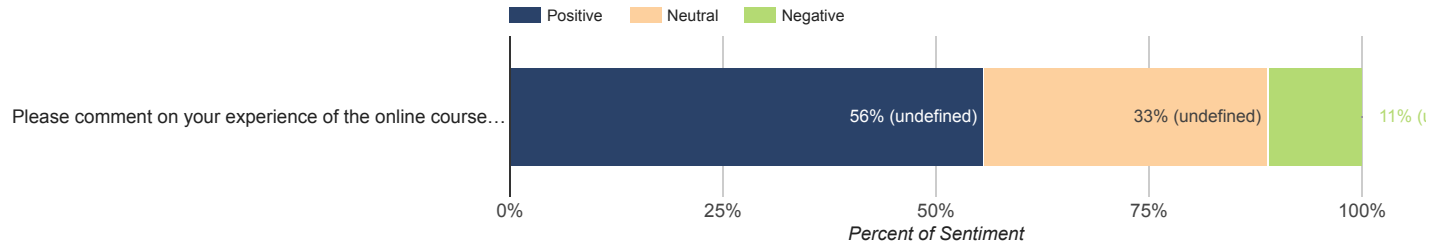

- 1 Improve the logistics of the course, design your own syllabus and course requirements. The TAs are completely unsure about what is expected. The course content taught in class is just slide reading and no in depth understanding of material is provided. There is a lot to improve on this course.
- 2 Better TA hours
- 3 Less computing power and less hours to run the code
- 4 The course is perfect. Assignments challenge you, and the classes prepare you for the assignments. You get to learn a lot through assignments.

Student Self-Assessment of their Effort to Achieve Course Outcomes (11 comments)

Q: What I could have done to make this course better for myself.

- 1 Spend more time and try out the extra credits
- 2 I did my best based on what resources and logistics situation was in the course.
- 3 A little more organised Office Hours and clear instructions about assignments to TAs.
- 4 A little bit of heads-up that Prof. Virgil Pavlu designed the assignments.
- 5 Started on homework earlier
- 6 Start on the assignments earlier.
- 7 Better logistics could make the assignments easy to follow. It is not the difficulty but the ambiguity in the instructions that needs OH for clarifications.

- 9 It was good
- 10 More direct code experience for abstract concepts without consistent direct examples for each homework
- 11 Being more interactive in class
