Instructor Related Questions: Jose Annunziato (58 comments)

Q: What were the strengths of this course and/or this instructor?

- 1 Josh is really a well-prepared teacher and he prepared well for the labs/ assignments to let students learn building website.

 I really like Josh and I hope a instructor can be like him, who are responsible, well-prepared, knowledgable in teaching area.
- 2 Very caring, organizes learning material well
- 3 Professor Annunziato knows a lot about Web Dev and very open to help students.
- 4 Professor is very responsible and concepts are super useful
- 5 Nicely arranged learning steps and clearly elaborated lectures.
- 6 The professor is patient and willing to answer questions even if he has already explained it before
- 7 Enthusiasm, responsiveness, exposure to a lot of information.
- 8 Definitely, Professor Annunziato's seasoned expertise in web development and his charisma helped throughout this whole semester.
- 9 Professor is very flexible in meeting student's requirement. I got sick with covid and Professor was kind me to allow assignment submission later, and yes without any penalty. In unforeseen circumstance like covid, where you don't know where you got exposure, assignment submission consideration from Professor is a big help.
- 10 A very accommodating and understanding professor. Very good at teaching/explaining the material to better understand.
- 11 very knowledgeable in course materials and patient
- 12 The instructor is skillful, understanding, and patient.
- 13 The homework settings are very reasonable
- 14 The teacher is very responsible, and the teaching materials are also prepared in great detail, which helps me better understand the ideas and details of web development.
- 15 all good
- 16 Excellent teaching!
- 17 The professor is very knowledgeable and clear in his explanations. He is always trying to help us out and improve our understanding
- 18 Nice professors!! Learned a lot from him the doc is also very comprehensive
- 19 professor clearly communicated the materials.
- 20 The professor is really good at web
- 21 easy to communicate
- 22 very detailed instruction
- 23 good programmer

Q: What could the instructor do to make this course better?

- Could check emails/piazza more often.
- 2 If the office hours could be a bit more friendly to the students on the West Coast. Since the OHs were too early, I wasn't really able to join his office hours... it was 5AM on the West Coast.
- 3 Less workload and response to email or piazza faster
- 4 Improve TA grading training so as to be consistent with professor. Improve assignment instruction and fix small bugs.
- 5 Discussed above about assignments. Also on quizzes and exams, I understand the reasoning of using random variable names like wer and uyt. But it would be helpful to use short nouns or letter combos that are easily distinguishable from each other. Several times I lost points on quizzes or exams just because I confused two variables in my head because they sounded very similar to each other.
- 6 Extending deadlines to allow students to not overload really quickly.
- 7 Professor is the best. If something can change, that would be last assignment could have been due on November instead of December. That way we would have got plenty of time to implement in project what we learned from last assignment. Even though project was opened beginning os semester, what we learned in last two assignment was most implemented in project.
- 8 Better management in TA team and OH, like having waiting room for professor OH, consistent answer from different TAs, and manageable and sufficient TA office hours
- 9 Have better office hour scheduling, considering all of the students from different time zones
- 10 Strengthen the training of teaching assistants, the points they give are unreasonable
- 11 There are some errors in the teaching materials and they could be improved.
- 12 all good
- 13 Maybe simplify the first few assignments a bit as it is most related to styling, and put more time to back end node app and api building async etc
- 14 Some of the ta is not that good and responsible
- 15 I feel it could be better to use less Al auto-fill that we can better following the code.
- 16 To help us more about homework

Q: What could the instructor do to make this course better?

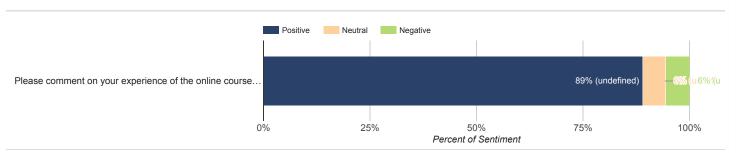

- 17 make communication more effective
- 18 TAs need to align their grading standards.
- 19 more organized office hour
- 20 make course shorter

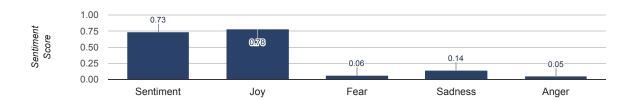

Q: Please expand on the instructor's strengths and/or areas for improvement in facilitating inclusive learning.

- The TAs are not very responsible especially about their office hours. They regularly don't show up on their office hours with or without prior notice. Furthermore, there are too many office hours cancellation even with the prior notification which frustrates students who need help for the class. Also, some TAs just easily say they don't know about the problem and ask us to ask other TAs which is not very professional as TA. They must be more responsible and help their students. Especially, when they encounter some problems they don't know, they need to contact Professor and get some solutions and contact the student back; not just saying "they don't know". Other than some unprofessional TAs, this course was very well organized and helpful to learn Web development.
- 2 make the homework more reasonable so we don't need to waste time on doing repeat work
- 3 N/A
- 4 What in tarnation is inclusive learning?
- 5 I greatly appreciated the detailed instructions for both labs and homework. Probably to make it more inclusive I would personally decrease/cut the number of homework requirements
- 6 A lot of TAs don't show up on their working hours at all. It should be regulated that if they don't come, please send out a message beforehand on Canvas. Stop wasting lots of students' time by ghosting in the office hours.
- 7 Strengthen the training of teaching assistants, the points they give are unreasonable
- 8 Recommend some better projects for us to study
- 9 all good
- 10 Great teaching!
- 11 The professor always listens to and incorporates our feedback into his teaching, which is helpful. This includes posting his code onto github so we can use it as a template and simplifying assignments to take time to comprehend concepts. Also, the class is structured in a way that you understand how the topics build off of each other and flow together.
- 12 I hope professor could give more guidance for deploy issue.
- 13 None
- 14 good
- 15 good programmer

Questions to Assess Students' Online Experience (18 comments)

Q: Please comment on your experience of the online course environment in the open-ended text box.

- 1 It's flexible and I can study the course based on my schedule. \star \star \star \star
- 2 Professor Jose Annunziato is the best! He is very friendly and makes the concepts really simple and easy to understand. The course materials are really useful and the assignments are a good way to get hands on with the concepts. *
- 3 Very clear explanation on concepts ★★★☆☆
- 4 I learned a lot from the course. ★★★★
- 5 Lectures and materials were helpful to learn subject matter. I think assignments could be tweaked to get more practice with concepts. I felt like most of the time I was spending on assignments and the project was tweaking css. ******

Professor and TA made the learning annivorment accessible to me despite the time difference ****** The professor is professor and troubledgeable. He is exto pashed, trying to be to ut students. It would be nicer if he has some office hours for the West Coast students. At of his office hours are found in some office hours for the West Coast students. At of his office hours are found in some office hours are found in some office hours for the West Coast students. At of his office hours are found in some office hours for the West Coast students.
